

Cataract Surgery in Adults Supplemental Instructions

Certain types of cataracts are a result of an underlying disease, condition, or causative agent.

Coding guidelines require that the following ICD-10 codes must be billed in conjunction with the underlying disease or condition: H26.211, H26.212, H26.213, H26.221, H26.222, H26.223, H26.231, H26.232, H26.233, or H28. The underlying disease or condition must appear and be coded first on the claim.

ICD-10 codes H26.31, H26.32, H26.33, or H26.8 must be billed in conjunction with the causative agent.
